PLOMB TOOL SETS FOR WAR VETERANS

Obtainable FREE under the Government's Apprentice Training Program

Two tool sets for War Veterans are offered by the Plomb Tool Company—a $100 set and a $50 set. Both sets were selected after a very careful study of the requirements of apprentice mechanics. They are SUGGESTED sets, however, and purchasers have the option of making their own tool selections. For the great majority of Veterans, the sets proposed by Plomb should be suitable with only a few, if any, variations.

The $100 Master Tool Set, illustrated on Page 2 and listed on Page 3, contains 113 items. Including ¾" drive sockets and several large wrenches, it is ideal for shops that make heavy and light repairs.

The $50 Tool Set, illustrated and listed on Page 4, contains 60 items. These tools are the ones used most in the average shop, and they will handle practically all of the jobs encountered in the training period.

START WITH THE BEST TOOLS

If you begin your training with the same tools used by expert mechanics, you will learn faster. And when you become a professional mechanic, you will own a set of tools that you will be proud of—and that will help you earn more money.

Plomb tools are the favorites of expert mechanics everywhere, and for several good reasons. Their superior design provides strength, lightness, correct balance and ease of handling. Proper steels, forging and heat treatment add to their life. Advanced manufacturing methods result in accurately fitting, safe tools. They cost less to use because of their low first cost, long life and ability to handle jobs efficiently. And all Plomb standard tools are GUARANTEED against defective workmanship or material.

PROCEDURE FOR OBTAINING TOOLS

A Veteran who wishes details on how to obtain tools should contact the Rehabilitation Division of the nearest Veterans Administration field office.

ORDER FROM PLOMB DISTRIBUTORS

No orders from training schools, apprentices or their employers are accepted by the Plomb Tool Company, since all sales are made through established distributors.

Plomb tools are sold by leading automotive parts, mill supply, industrial, hardware, implement and other dealers in all parts of the country. The Veteran sets listed are not assembled and shipped complete by Plomb to its distributors, so that assembled sets may not be on display. Plomb distributors, however, carry the necessary items in stock and they will be glad to help you select your set.

PLOMB TOOL COMPANY

2209 Santa Fe Ave., Los Angeles 54, Calif.
